

WANTED!

Medical Terminologist (FR)

WHO WE ARE

EarlyTracks is a startup-size company that develops innovative solutions to improve **healthcare** data management. We work with a combination of modern technology solutions (such as **machine learning**, text mining, NLP, distributed storage, semantic technologies) and the everyday reality of our end users' challenges.

The company is based in **Brussels** (between Schuman station and Merode).

ABOUT THE OFFER

As a Medical Terminologist you will join a small team of language experts and you will have these responsibilities.

- Develop and maintain linguistic resources (specialized dictionaries and semantic subsets) necessary for business requirements
- Translate clinical concepts from English to French ([Snomed CT](#))
- Perform corpus annotation and analysis
- Carry out terminology development, edition and maintenance
- Coordinate the efforts of the terminology the team in various projects assigned to them

WHO YOU ARE

Must have skills

- Education degree or equivalent in Linguistics or Translation
- A few years of experience in Linguistics/Terminology/Translation field
- Proficient in English and French

Nice to have skills

- Basic knowledge in programming (e.g. Python, Perl)
- Knowledge in corpus linguistics, ontology, semantics, lexicology, syntax, etc.
- Medical knowledge or experience (familiarity with patient data management or medical documentation)
- Knowledge of clinical terminologies, classifications and standards such as Snomed CT and ICD10
- Knowledge of other languages
- Experience using CAT tools (e.g. SmartCat)
