

CHIEF MEDICAL INFORMATION OFFICER (CMIO)

WHO WE ARE

EarlyTracks provides solutions to produce interoperable medical records that are understandable by humans and machines. These structured medical records are a key driver for innovation in the healthcare industry as most new technologies depend on good data input to properly work: advanced clinical research, AI for clinical decision support, Business Intelligence solutions, and many more all require good input data or they simply don't work.

Producing meaningful structured medical records is an extremely difficult task given the complexity of the medical field. EarlyTracks is the European reference in answering these challenges and created advanced AI technologies such as a Medical NLP model to extract medical records from the medical texts produced by the doctors (currently for French & Dutch). Additionally, we also produce tools to manage and improve the quality of medical records.

Our customers are primarily care institutions (hospitals and alike) but we also work with other solution providers such as research companies and AI solutions.

The company is based in **Brussels** (EU district).

JOB DESCRIPTION

As CMIO, your role will be divided into 3 main topics:

1. Serve as a liaison between EarlyTracks and the medical & IT departments at a healthcare organization. You'll take over those responsibilities:
 - a. Evaluate and audit the healthcare institution's IT systems to understand their workflow of medical information production ;
 - b. Analyze medical data to provide guidance on the best use of our tools ;
 - c. Train physicians and other medical professionals in IT systems and applications on the use of our tools and terminology standards ;
 - d. Advising care institutions executive leadership on the subject of health informatics.
2. Act as an internal and external reference in the field of HIM:
 - a. Study trends in Health informatics and leverage medical data to improve EarlyTracks services and daily operations ;
 - b. Participate in (public and private) task forces ;

- c. Work with national, European and International reference bodies in the field of health Information Management with a clear focus on Documentation Quality ;
3. Support the internal team on product definition and success management :
 - Support EarlyTracks general management on strategic matters ;
 - Support the Head of Operations and the Head of Growth in the client success management (acting as the Voice of end Users) ;
 - Give medical input on product-related internal projects ;
 - Conduct data analytics research and report findings.

WHO YOU ARE

MUST HAVE SKILLS

- Education and significant experience in medicine as Physician ;
- Education or strong interest in Health Informatics ;
- Excellent analytical and communication skills ;
- Autonomy, pro-activity but also a good team spirit ;
- Proficiency in French and English.

EXTRA POINTS FOR

- Field expertise within a care institution ;
- Knowledge of German and Dutch ;
- Knowledge of interoperability related standards like SNOMED CT, HL7 FHIR resources, etc.

WHAT'S IN IT FOR YOU

- Have a positive impact on society by making care more accessible and qualitative ;
- Enjoy flexible working hours and location to find the work mode that is the best for you.
